

IN THE SPECIFICATION

Please amend the specification as follows:

Please replace the paragraph at page 10, starting at line 7 with the following:

The glass chosen for the substrate coated with the multilayer A according to the invention or for the other substrates that are associated therewith in order to form a glazing unit, may in particular be, for example, extra clear of the "~~Diamant~~" DIAMANT type, or clear of the "~~Planilux~~" PLANILUS type or tinted of the "~~Parsol~~" PARSOL type, these three products being sold by Saint-Gobain Vitrage, or else they may be of the "TSA" or "TSA ++" type, as described in patent EP 616 883. The glass may also be optionally tinted, as described in patents WO 94/14716, WO 96/00194, EP 0 644 164 and WO 96/28394. It may also be glass that filters radiation of the ultraviolet type.
